Dover Fastrack – Dover Road, Guston Update on the Road Widening and Resurfacing works

The carriageway surfacing to the south of Burgoyne Heights has been completed along with the planned Affinity Water works. However, the widening works that are currently taking place between Old Charlton Road and Burgoyne Heights are taking longer than planned, largely due to the poor weather conditions that have been experienced over the last few weeks and discovery of uncharted utility services. Works are now expected to be complete by 14 May 2024.

We have also been reviewing the extents of the resurfacing in Dover Road and will be extending these works to include the resurfacing of Dover Road between Old Charlton Road and 'Moko', as annotated in dark blue on the plan below.

The contractor will contact each of the ten affected properties nearer the time of the works as it will be necessary to restrict access whilst the works are taking place, although access will be maintained at other times. During this phase of work which is expected to take 2 days to complete (one day for the removal of the existing surface and one day to lay the new surfacing), the junction of Old Charlton Road will also be closed. Advance warning signs will be placed onsite to advise dates of when the junction will be closed.

We ask for your continued patience and co-operation whilst these works are undertaken but if you have any concerns or require more information about this work, please call us on **03000 418181** or via email at dovertastrack@kent.gov.uk.

For your safety and the safety of our workforce, please drive carefully and slowly through the roadworks and along the diversion route.
